

Ann Clare Kessler

Former Global Head, International Project Management; US Head,
Exploratory Research, Pharmacology & Chemotherapy, Hoffman-La Roche

With a PhD in Biochemistry from NYU, Dr. Kessler went on to the research leadership at Hoffman-La Roche and was Vice-President and Head, Exploratory Research responsible for discovery and development of novel drugs in multiple therapeutic areas. Subsequently, from 1990-1995 she was Head of Roche's International Project Management overseeing the global drug development. Her research interests are in regulation of energy balance, biochemical mechanisms in lipid metabolism, appetite and thermogenesis and she has published 105 peer-reviewed research papers. She is currently on the Board of Directors of Epigenomics, The Vaccines Company, Medgenesis Therapeutix and the Scientific Advisory Boards of GenProbe and Maxim.
